PENNSYLVANIA COVID-19 PPE & SUPPLIES BUSINESS-2-BUSINESS (B2B) INTERCHANGE DIRECTORY

Company and product information provided in this directory were gathered in good faith as a means of connecting Pennsylvania businesses and organizations that are seeking various PPE and other related items to combat the COVID-19 crisis. The information made available is from those entities who voluntarily contacted the commonwealth through the [Manufacturing Call to Action Portal](#) or the [Pennsylvania Critical Medical Supplies Procurement Portal](#).

The immediate goal of this B2B Interchange Directory is simple: to provide an opportunity for companies and other entities in need of PPE and other critical items to make a B2B connection as they may choose with manufacturers and suppliers of COVID-19 related items.

COVID-19 GUIDANCE: Farmers Markets & On-Farm Markets

Farmers markets and on-farm markets are encouraged to follow the COVID-19 guidance for farm and distribution preparedness, in addition to the following recommendations developed for farmers markets.

1. Prepare market and individual stands

- Consider delivery or pick up options
- Consider pre-packaging bags of fruits, vegetables, other items to limit shoppers' handling of food and to keep customers moving quickly along.
- Consider alternate locations that could allow drive through or pick up.
- Consider putting up signs and information on websites and social media to explain any changes, delivery options, or extra precautions taken to limit exposure to COVID-19. Ex: Instruct customers not to handle food. Package cheese and eggs for customers, even if the cheese and eggs are individually packaged. Open egg cartons for customers to see the eggs they are getting instead of having them handle multiple cartons.
- Separate stands if possible, to limit crowds – try to separate stands at least six feet apart. Possibly consider limiting the number of customers within your market at one time in the case of "panic shopping".
- If possible, have a different person handle products and handle money or wash hands or sanitize in between these tasks.
- Remove tablecloths and sanitize tables regularly.
- Eliminate samples
